

10' High x 30' Wide Backstop

Assemble with Adult Supervision

♦ Important Tips

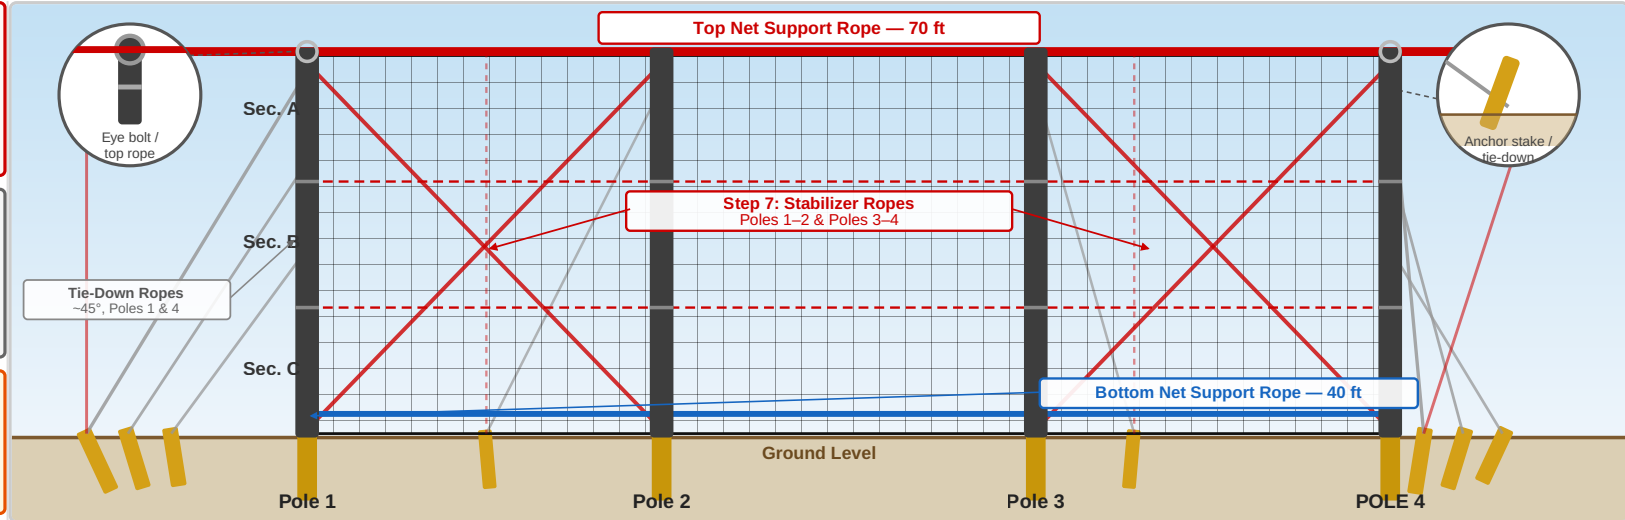

Backstop is made of **heavy-duty steel tubing**. Some weathering may occur if paint chips. Always assemble with adult supervision.

Tools Needed

- Hammer
- Tape Measure
- 8 ft Utility Ladder
- Level

⚠ Warning

Dangerous in high winds. Do not stand near poles during thunderstorms or windstorms.

Step 1 Unpack & Inventory

- 4 – Poles: Parts **A**, **B** & **C** (4 of each)
- 1 – 10 ft x 30 ft Net
- 5 – Pole Ground Spikes (1 extra)
- 13 – Line Spikes w/ Cord (3 extra)
- 18 – Quick Fasteners
- 2 – Stabilizer Ropes (~15 ft ea.)
- 1 – 40 ft rope & 1 – 70 ft rope
- 1 – Ground Stake Adapter

Step 2 Set Ground Stakes

Measure and mark 4 positions:

Start ● 10 ft ● 20 ft ● 30 ft

Use the **Stake Adapter** over each spike before hammering — protects the spike tip.

Step 3 Assemble Poles

Connect each pole: **C (Base)** → **B (Middle)** → **A (Top)**. Repeat for all 4.

Step 4 Install Poles

Insert Part C of each assembled pole into its ground stake.

Step 5 Tie-Downs on Poles 1 & 4

Attach 3 tie-downs to each outer pole at ~45° outward.

⚠ Do NOT fully tighten until Step 9.

Step 6 Tie-Downs on Poles 2 & 3

Attach 2 tie-downs to each inner pole (one per side).

⚠ Do NOT fully tighten until Step 9.

Step 7 Install Stabilizer Ropes

Thread rope through Poles 1 & 2, then separately through Poles 3 & 4. No rope between 2 & 3.

Leave slightly loose until Step 9.

Step 8 Hang the Net

(Ladder needed) Feed top edge binder into pole tops. Slide net onto Poles 1–4 at the marks on the net.

Step 9 Tighten All Ropes

Now that the net is hung, fully tighten all tie-downs and stabilizer ropes.

Step 10 Quick Fasteners

Poles 1 & 4: 7 fasteners each.

Poles 2 & 3: split remaining 4 evenly.

Step 11 Bottom Rope (40 ft)

From Pole 1, lace rope through every bottom-row square. Hook under spike lip at Poles 2 & 3. Tie off at Pole 4. Keeps balls from going under the net.

Step 12 Top Rope (70 ft)

From center anchor stake, thread up through Pole 1's eye bolt. Lace every 4th square across top. Tie off at each pole's eye bolt. Finish at Pole 4, then tie to other center stake and outer anchor spikes.

Your Backstop is ready — Have Fun & Play Safe!
